The diagram illustrates the transformation of a matrix from row echelon form to reduced row echelon form. It shows two matrices connected by a blue arrow, with the operation performed indicated below each matrix.

Left Matrix (Row Echelon Form):

1	0.2
0	1

Operation: \times 0.2

Right Matrix (Reduced Row Echelon Form):

0	1
1	0.2

The operation shown is subtracting 0.2 times the first row from the second row, resulting in a leading 1 in the second row.

Row echelon form

The diagram illustrates the transformation of a matrix from row echelon form to reduced row echelon form. It shows two matrices connected by a blue arrow, with the operations performed on the second matrix indicated below.

Initial Matrix (Row Echelon Form):

$$\begin{bmatrix} 1 & 0.2 \\ 0 & 1 \end{bmatrix}$$

Operation: $\times 0.2$ (applied to the second row)

Resulting Matrix (Reduced Row Echelon Form):

$$\begin{bmatrix} 1 & 0.2 \\ 0 & 0.2 \end{bmatrix} \xrightarrow{-} \begin{bmatrix} 1 & 0.2 \\ 0 & 1 \end{bmatrix}$$

The final matrix is the reduced row echelon form, where the second row has been scaled by 0.2 to create a leading 1.
